The *Conti Brother's Stone Company* "Pietra Serena dei Fratelli Conti s.r.l." was founded to meet the needs of the stone market as a point of reference for high quality craftsmanship in the area of natural stone with particular emphasis to the artistic and artisan aspect of commissions with Pietra Serena.

The company is composed of four members all highly qualified and skilled stone masons with many years of experience thus allowing the company to meet customer requirements with practically any article that is able to be made from Pietra Serena.

Infact, with the assistance of the latest state of the art machinery and tecnology together with it's high standard of craftsmanship and particular regard to final finishings and trimming, it prides itself in being able to produce even small sculptures (bas-relief/statues)

Estimates can be provided for the preparation and laying of pavements and flooring, wall coverings of any kind with any finish desired. Our complete collaboration is offered for all your needs together with our expertise and knowledge in creting works in series or individual pieces according to design or specification.
